

1.3.21 Year 3 WALT: To be able to add fractions with the same denominator within one whole

1.3.21 Do it

WALT: To be able to add fractions with the same denominator within one whole

Calculate:

$$\frac{1}{3} + \frac{1}{3} = \quad \square = \frac{5}{8} + \frac{2}{8}$$

$$\frac{1}{5} + \frac{1}{5} = \quad \frac{1}{8} + \frac{2}{8} + \frac{3}{8} =$$

$$\frac{2}{5} + \frac{1}{5} =$$

Deepen it

Find possible values for A and B.

$$\frac{A}{8} + \frac{B}{8} = \frac{7}{8}$$

Find possible values for A, B and C.

$$\frac{A}{10} + \frac{B}{10} + \frac{C}{10} = \frac{9}{10}$$

1.3.21 Secure it

WALT: To be able to add fractions with the same denominator within one whole

Colin thinks that:

$$\frac{1}{3} + \frac{1}{3} = \frac{2}{6}$$

Explain why he is incorrect.
