

8.2.21

WALT: To be able to locate physical and human feature: To know how to present geographical statistics as graphs and tables.

Below is a map of part of the city of Bristol. Your task today is to sketch a map of this area of Bristol. Look at the example map to help you understand how to do this. Make sure you add labels for the landmarks and road names eg, Bristol bridge.

Once you have sketched your map of the city of Bristol, I want you to record what you can see in a tally chart.

Complete the chart below for all the physical and human features you can see. I have done the first two examples for you. See what else you could record.

Human/ physical feature	Tally (how many can you see?)
Bus stops	
Parks	
Restaurants
