

2.3.21 Year 4 WALT: To be able to Use written method to divide a 3-digit number by a single digit number (hundreds = multiple of divisor, tens > divisor) with no remainder

2.3.21 Do it

WALT: To be able to Use written method to divide a 3-digit number by a single digit number (hundreds = multiple of divisor, tens > divisor) with no remainder

Calculate:

$$\begin{array}{r} 3 \overline{) 645} \\ 3 \overline{) 945} \\ 5 \overline{) 575} \end{array}$$

$$678 \div 6 =$$

$$\square = 684 \div 6$$

2.3.21 Secure it

WALT: To be able to Use written method to divide a 3-digit number by a single digit number (hundreds = multiple of divisor, tens > divisor) with no remainder

Coco is calculating

$$969 \div 3$$

She writes: $969 \overline{) 3}$

Explain why she is incorrect.

Deepen it

Find the missing digits.

$$1 \square 6$$

$$\square \overline{) 58 \square}$$

$$\square 17$$

$$\square \overline{) 86 \square}$$

$$32 \square$$

$$\square \overline{) \square \square 8}$$

Solve each calculation in several ways, if possible.

Solve all the calculations together using the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, 9 once.
