

We are Designers

Structures

We are curious, we are unique, we are together, we are Whiteshill!

Camouflage: hide something by making it blend in with its surroundings.
Bird Hide: shelter used to observe wildlife, especially birds, close-up.

Design: Show how your product is going to meet your audiences' wants and needs.
Make: Create your product in line with your design.
Evaluate: decide whether your product has been successful in line with your design.

Elements of Design
Audience: who we are making our product for.
Product: what we are making.
Purpose: the reason we are making our product.
Design Criteria: The things that our product must include to be successful.
Initial ideas: lots of ideas which might work.
Final idea: the chosen idea which best meets the design criteria.
Prototype: a first version of a product used to develop the idea, sometimes smaller than the actual product.
Material – what the product is made of.
Feedback – what do people think of your product.

Straw Joining Techniques

Bird hides were originally built mainly as hunting aids.
